DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Use Restrictions: In edible product areas of food handling establishments, restaurants or other areas where food is commercially prepared or processed, or in serving areas when food is exposed, this product may only be applied as a crack and crevice treatment. Any product remaining outside of cracks and crevices must be cleaned up and removed.

***Kills:** Ants, (except Carpenter Ants, Fire Ants and Harvester Ants)

For Use in and Around: Homes, hospitals, restaurants, apartments, grocery stores, institutional buildings, schools, cafeterias, warehouses, storage areas, food processing plants, mobile homes, boats, military bases, theaters, nursing homes, and on military, commercial, and cruise ships.

Ant Control and Elimination: Ants will initially feed in large numbers, but then disappear. InTice Gelanimo is designed to allow worker ants to take the product back to the nest and deliver it to the rest of the colony. Monitor the bait placements and ensure there is always a fresh supply of InTice Gelanimo Ant Bait at each placement.

Indoor Use

Apply the product to small pieces of cardboard, paper or foil, or in purpose built bait stations such as Rockwell's BaitPlate™ Station (sold separately) and place product in areas inaccessible to children and pets where ants are seen. Ants often trail along structural edges and will seek out moisture and food. Bait around sinks, tubs, window sills, under food cabinets, around floor edges and in corners. Use numerous bait placements, rather than fewer large

Continued from back panel

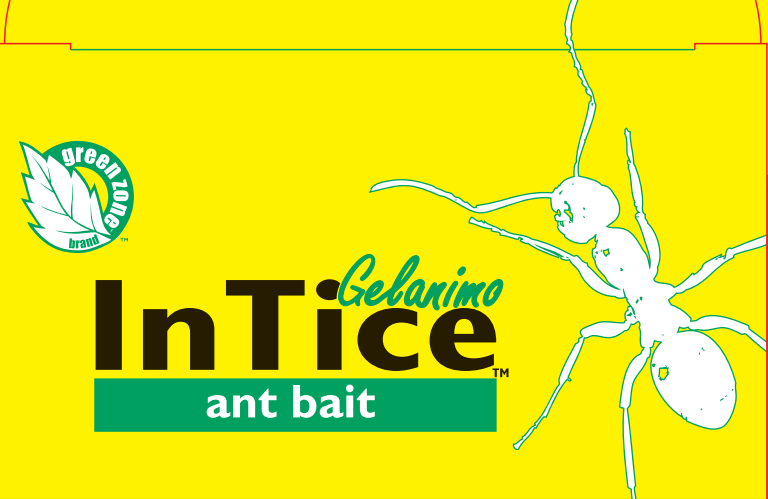

placements. Often, invading ants nest outdoors. It will help to bait outside, close to where ants are found entering the structure. Ants normally follow specific trails from the nest to food or water. Placing InTice Gelanimo close to these trails will improve control.

Outdoor Use

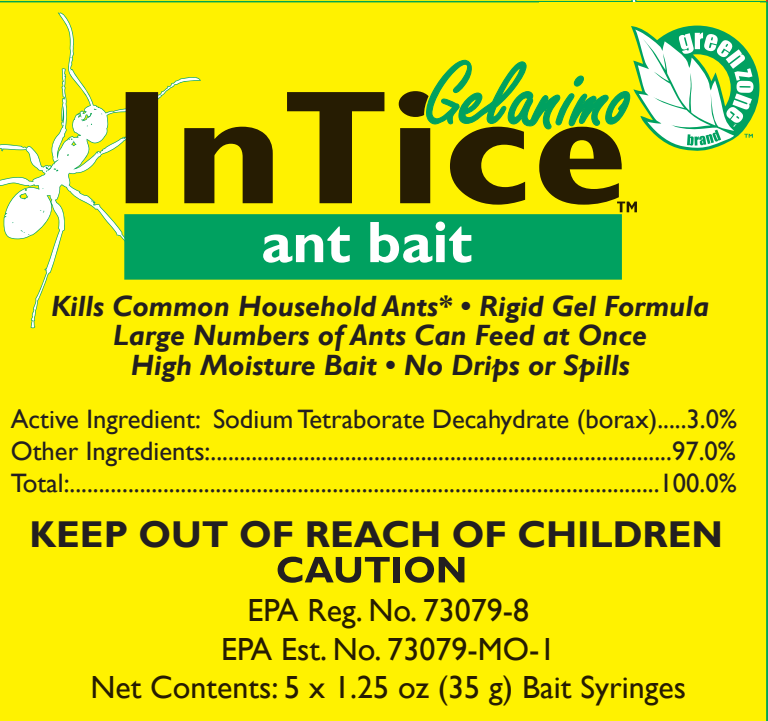

Environmental Hazards: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high-water mark. Do not contaminate water when disposing of equipment washwaters or rinsate.

Outdoor Baiting: Locate areas around the building where ants are seen trailing. Apply InTice Gelanimo in areas inaccessible to children and pets. For a perimeter defense system, place bait stations near the foundation or where ant trails are found. Spacing the bait stations every 5 to 10 feet around the perimeter will provide the best results. Check the bait stations regularly for activity. Remember ants will feed on InTice Gelanimo Ant Bait and carry the bait back to the rest of the colony. Heavy infestations may require several bait placement refills.

InTice[™] *Gelanimo*
ant bait

InTice[™] *Gelanimo*
ant bait

Kills Common Household Ants* • Rigid Gel Formula
Large Numbers of Ants Can Feed at Once
High Moisture Bait • No Drips or Spills

Active Ingredient: Sodium Tetraborate Decahydrate (borax).....3.0%
Other Ingredients:.....97.0%
Total:.....100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

EPA Reg. No. 73079-8
EPA Est. No. 73079-MO-I
Net Contents: 5 x 1.25 oz (35 g) Bait Syringes

InTice™ Gelanimo™ is a patent pending, “rigid gel” formulation (similar to gelatin). The rigid gel contains a high moisture content, like liquid bait, yet remains rigid at temperatures up to 130 °F. Since ants can walk on top of the bait, more ants can feed at one time.
